

**Features**

- Large volume (ideal when deadlines are critical)
- Easy to use
- Four roller seal unit
- Lockable fold plates
- Manual seal
- Adjustable processing speed
- Friction reverse roller (FRR) with a cooling system
- 1,200 Sheet in-feed based on 100gsm ps paper

The Postmate 6HD is a high volume easy to use offline sealer. The machine is based on proven technology, incorporating a four roller seal unit. It has an infeed capacity of 1,200 pressure sealed forms and operates at a speed of up to 13,000 forms per hour.

The machine also features lockable fold plates that are locked into position to prevent movement during machine operation at speed. Another useful feature of this machine is the 'Manual Seal', which allows the operator to process an individual or damaged form through the sealing rollers, removing the need to reprint. Includes Vertical stacker that keeps sequence and holds up to 800 sealed forms.
