

Mailfinisher LJ4000

The Mailfinisher LJ4000 is compatible with all of the HP LJ4000 range of printers. With processing speeds of up to 3,300 forms per hour, and a range of features to enable ease of use, this is the ideal machine for all types of print to mail pressure seal applications. Incorrect or double-feed stationery will be detected by the integrated imaging system and diverted to the by-pass tray. An optional cabinet is available, allowing for extra paper trays on the printer, thereby maximising feeder capacity. We would recommend this machine to companies wishing to process up to 4,000 forms per month.

Features

-  Paper thickness sensor
-  Digital batch counter
-  Manual Feed allowing the processing of single forms
